## Personal Summary

---

Freelance full-stack developer with a systems-oriented approach to building web platforms, automation tools, and Web3-enabled applications. Experienced in delivering contract-based projects for organizations and startups, with strong emphasis on execution, maintainability, and real-world deployment using modern frameworks and AI-assisted workflows.

## Technical Skills

---

**Programming & Frameworks:** JavaScript, TypeScript, Python, React, Next.js, Node.js, Django, FastAPI

**Systems & Tools:** REST APIs, PostgreSQL, Git, Docker, CI/CD, Cloud deployment

**Blockchain & Web3:** Smart contracts, token integrations, blockchain-based platforms

**AI & Automation:** AI-powered assistants, chatbots, workflow automation, model integration

## Experience

---

**Freelance Full-Stack Developer (Contract-Based)** 2023 – Present  
*Self-Employed*

- Delivered contract-based web applications for startups and organizations.
- Built and deployed full-stack systems using React, Next.js, Node.js, Django, and FastAPI.
- Implemented dashboards, APIs, LMS platforms, and automation tools.
- Managed projects end-to-end: requirements gathering, development, testing, and deployment.

### Selected Client Projects:

- **EcoMentor (ecomentor.green)** — Designed and built an AI-powered learning management system (LMS).
- **Simplified Datahub** — Designed and developed the company website with focus on clarity and usability.
- **Supacare Solutions** — Built a professional business website to support service visibility and client engagement.

- **Cloud Act Technologies** — Developed a corporate website for an ICT services firm, including structured service pages.

## Startup Experience

---

**Founder & Product Lead** — Kilimofresh (Early-Stage Startup) 2024 – Present

- Founded an early-stage startup exploring digital platforms for fresh produce supply chains.
- Led product definition, system design, and early technical exploration.
- Oversaw business registration, compliance, and initial structuring.

## Independent Projects

---

- **Carbonnet** — Blockchain-based carbon credit marketplace (prototype).
- **Smart Contract Ticketing Bot** — Automated on-chain ticketing system.
- **Automated Trading Bot** — Cryptocurrency trading automation platform.
- **Discord Moderation Bot** — Automated server moderation system.

## Education

---

**Jomo Kenyatta University of Agriculture and Technology (JKUAT)** 2022  
BSc. Project Management

**Mount Kenya University**  
Diploma in Law (In Progress)

## Certifications

---

Agile Scrum Master (Simplilearn)  
Blockchain Basics (Cyfrin Updraft)  
Introduction to Cybersecurity (Cisco)
